

Password Reset & Account Recovery Guide

SupportDesk Help Center | Version 4.1

1. Standard Password Reset (Self-Service)

Use this method if you can still access your registered email address.

Step 1 — Visit the Login Page

Navigate to <https://app.supportdesk.io/login>. Click the '**Forgot Password?**' link below the password field.

Step 2 — Enter Your Email Address

Type the email address associated with your SupportDesk account and click **Send Reset Link**.

Step 3 — Check Your Inbox

You will receive a password-reset email within 2 minutes from no-reply@supportdesk.io. If you do not see it, check your Spam or Junk folder. Add no-reply@supportdesk.io to your safe-senders list to prevent future delays.

Step 4 — Click the Reset Link

The reset link is valid for **30 minutes**. Clicking it opens a secure page to create your new password. The link is single-use; once clicked, it cannot be reused.

Step 5 — Create a New Password

Your new password must meet these requirements:

Requirement	Rule
Minimum length	12 characters
Uppercase letters	At least 1 required
Lowercase letters	At least 1 required
Numbers	At least 1 required
Special characters	At least 1 required (e.g. ! @ # \$ % ^ &)
Previously used passwords	Cannot reuse last 5 passwords

Step 6 — Log In With New Password

After saving your new password, you will be redirected to the login page. All existing sessions will be invalidated for security — you will need to log in again on all devices.

2. Password Reset When Two-Factor Authentication (2FA) Is Enabled

If 2FA is active on your account, follow these additional steps after receiving the reset email:

Step A — Enter the new password as described above.

Step B — When prompted for your 2FA code, open your authenticator app (Google Authenticator, Authy, or 1Password) and enter the current 6-digit code.

Step C — If you no longer have access to your authenticator app, click '**Use a backup code**' and enter one of the 8-digit backup codes you saved when setting up 2FA.

Step D — If you have lost both your authenticator app and backup codes, you must use the Account Recovery process described in Section 4.

3. SSO Users — Password Reset via Identity Provider

If your organisation uses Single Sign-On (SSO), your password is managed by your Identity Provider (IdP), not SupportDesk. You cannot reset your SupportDesk password directly.

Contact your IT team or HR department to reset your password through:

- **Okta:** <https://yourcompany.okta.com> → Profile → Change Password
- **Azure Active Directory:** <https://myaccount.microsoft.com> → Change Password
- **Google Workspace:** <https://myaccount.google.com> → Security → Change Password

4. Account Recovery (Locked Out)

Use this process if you cannot access your registered email address or have lost all 2FA credentials.

Step 1 — Email support@supportdesk.io from any email address you have access to.

Step 2 — Include the following information in your email:

- Full name on the account
- Company name (if on a team plan)
- Last 4 digits of the payment card on file (if applicable)
- Approximate sign-up date
- The last ticket number you remember creating

Step 3 — Our support team will respond within 1–2 business days to verify your identity. Once verified, we will update your email address and send a password-reset link.

5. Admin — Resetting a Team Member's Password

Account admins can trigger a password-reset email for any team member:

1. Go to **Settings** → **Team** → **Members**.
2. Find the team member and click their name.
3. Click '**Send Password Reset Email**' in the top-right.
4. The team member will receive a reset email within 2 minutes.

Note: Admins cannot see or set a user's password directly — only the user can set their own password through the reset link.

6. Frequently Asked Questions

Q: I clicked the reset link but it says 'link expired'.

A: Reset links expire after 30 minutes. Return to the login page and click 'Forgot Password?' to request a new link.

Q: I'm not receiving the reset email.

A: Check your spam/junk folder. Add no-reply@supportdesk.io to your safe-senders list. If still not received, your email provider may be blocking it — try from a different email client or contact your IT team.

Q: I reset my password but still cannot log in.

A: Clear your browser cookies and cache, then try again. If using a password manager, ensure it has updated to the new password. If the issue persists, contact support.

Q: How often do I need to change my password?

A: By default, SupportDesk does not enforce mandatory password rotation. Enterprise administrators can configure mandatory rotation periods (e.g., every 90 days) under Settings → Security → Password Policy.
